Mike Ledgerwood *Publicity Director, Kit Buckler Press Officer*

JANUARY 1976

SPLINTER returned at Christmas from a highly-successful radio tour of the States. Although acclaimed by the media as one of the best singles of 1975, "Thick Way Will I Get Home" failed to capture the public. We are following this up with one of the more up-tempo tracks from the "Harder To Live" album. As always, SPLINTER are available for any promotional work. Incidentally, at the request of our Japanese licensee, SPLINTER are going into the studio any day now to put a Japanese lyric on three of their current tracks. If any of you are similarly interested, please get in touch with me.

HENRY McCULLOUGH - Up till Christmas, Henry was working in the States touring with Frankie Miller's group. He is now back in England and, in the near future, will be putting his own band together to tour. And he will be available for gigs and TV in Europe.

JIVA have just completed a tour of the States, supporting Fleetwood Mac. Reports are coming in of very enthusiastic audience response, not surprising since George signed them on the basis of their "live" performance. We are now working on bringing JIVA to Europe on a tour. The States are releasing an edited version of "Something's Goin' On Inside LA" - copies of which you will receive upon its release.

STAIRSTEPS - "From Us To You", the single released in the States before Christmas, is shooting up the R&B charts, and currently at No. 60 with a bullet in "Billboard". They are embarking on a major tour of the States, starting February 13, in their hometown, Chicago.

RAVI - The long-awaited film from the Albert Hall concert is now very near completion. It is half-hour in length, and includes an interview with George. We are hoping this will be ready for TV distribution in March, to coincide with the release of the festival album.

ATTITUDES are currently rehearsing with a view to club dates in the US.
